The Technical Report on the geology and drilling of the Dean Project has been completed and filed on SEDAR at www.sedar.com and is titled DEAN LITHIUM PROJECT NATIONAL INSTRUMENT 43-101 TECHNICAL REPORT, dated February 3, 2018, and prepared by Robert Marvin, B.Sc., PGeo.

The Report has also been posted on Cypress Development's web site and can be viewed here: <https://www.cypressdevelopmentcorp.com/site/assets/files/3731/final-final-feb-17-2018-tech-report-dean-project.pdf>

Robert Marvin, B.Sc., PGeo, VP of Exploration and Director of Cypress Development Corp., is the qualified person as defined by National Instrument 43-101 and has prepared and approved of the technical information in this report.

About Cypress Development Corp.:

Cypress Development Corp. is a publicly traded exploration company focused on developing the Company's 100%-owned Clayton Valley lithium project in the State of Nevada, U.S.A.

Cypress' Dean & Glory Lithium Project is located immediately east of Albemarle's Silver Peak mine, North America's only lithium brine operation. Recent exploration by Cypress has discovered an extensive deposit of lithium-bearing claystone adjacent to the brine field. With mineralization tested by drilling over a seven-kilometer trend,

the apparent size of the Dean & Glory deposit makes Clayton Valley a premier target that has the potential to impact the future of lithium production in North America.

Cypress Development Corp. has approx. 54.5 million shares issued and outstanding.
